Press Release

For Release: January 17, 2007

*Winchester Business Systems' AtSignOn™
Now Available for Lotus Notes version 7.0*

Winchester Business System's AtSignOn™ software is now available for Lotus Notes version 7.0 and Domino 7.0. This system works in conjunction with RSA SecureID and RSA Authentication Manager 6.x to enable secure access to Lotus databases, files and URL directories with two-factor authentication. Lotus Domino 7 includes new collaboration features and tools that can help improve productivity for IT administrators and corporate application developers.

Enterprise information boundaries have disappeared as corporations have opened their networks to allow external access to internal systems. In today's competitive environment, the need to provide network, system and application security is essential. AtSignOn software enables e-business by controlling access to corporate networks, Domino-based Web applications and operating systems.

AtSignOn is tested for Domino & Notes Releases 5, 6.0, 6.5 and 7 and includes many new features such as Single Sign On and support for the Name Look-up in the Domino Directories on an external server.

Founded in 1989, Winchester Business Systems, Inc. is a leader in providing software business solutions to the pharmaceutical, biopharmaceutical, and medical device industries. As an Advanced Industry-Optimized Business Partner for IBM, Winchester combines its knowledge of industry clinical practices with the application of IBM's collaborative technology to these areas.
